

onestar press erica baum sightings

A white egg shaped object was observed ascending into a fog bank and descending again at a greater distance before moving away. It had pulsating white or pinkish lights around a rim which looked like a flashing theater marquee.

an unnecessarily formal experience.

Two bakers observed a slow moving glowing red tinged white globe glide noiselessly over a bakery. It hovered about 20 seconds before moving out of sight.

A bright blue glowing object was seen flying in circular and zig zag patterns. At times a green light could be seen pulsating at tree-top level.

A strong red light was observed shining upward from a spherical grapefruit like object which had a white glow within. Travelling slowly it disappeared to the west.

A silvery thin object issuing an 8-foot colored vertical exhaust and carrying an orangish light descended with a falling leaf motion and disappeared behind trees in a large swamp.

A large elliptical object trailing a streak of violet light about one third its dimension came straight down out of the sky, struck the hedges and bounced straight up again out of sight

An approximately spherical object about ten to twenty feet in diameter hovered just above treetops before landing in a moss covered arroyo. A bluish orange flame appeared along the outer rim brightening considerably when the object ascended in a vertical trajectory before vanishing from sight.

A driver left her vehicle to get a closer look at a yellow ball of fire hovering low over snow covered trees. When she approached within 150 feet of it with a flashlight it accelerated away at a 45 degree angle causing snow on the treetops to swirl.

An oval object with rotating balls of white light was sighted. It passed first in front of and then disappeared behind low cumulous clouds.

The object was described as being oval and surrounded by a ring of vapor. It glowed violet when it was stationary but turned to a greenish blue when it moved away with a dancing motion.

A green triangular shaped object with its blunt end forward hovered over a farm before accelerating away at great speed and disappearing over the horizon.

Round bluish white, like a huge egg when hovering, the object went northeast, faded into clouds and then reappeared, finally fading off into the southwest.

Exactly at the center in the top of this platter shaped oval a white light was blinking an estimated four flashes per second. Travelling in a straight line without spinning, the object rose vertically through broken clouds.

She glanced outside and saw a red glowing object with a point on top and blue glowing square on its underside flying with a fluttering motion toward and then over Duck Pond. It circled and wobbled momentarily and then reversed direction without turning.
